

Power Line Rent-E-Quip, Inc (PLREI) requires any company that rents driven equipment to supply a USDOT Number. PLREI will post the USDOT Number on the equipment where it must remain throughout the rental period. A USDOT Number is used to identify your company and your driver in case of an accident or moving violation.

If you don't have a USDOT Number, you can acquire one by calling the phone number below. When you call, let them know that you will need a number to rent a driven piece of equipment. Due to Federal Regulations, we are unable to rent driven equipment to anyone without a valid USDOT Number.

## U.S. Department of Transportation
